Dear Parents and Carers

RE: Head Bump

Today at school your child sustained a bump to the head. One of our first aiders treated the injury as necessary and, on assessment, it was not thought necessary to refer them for further attention. However, in rare circumstances, symptoms can develop up to about 24 hours after the injury. Should any of the following conditions occur, please seek further medical advice for your child:

- Severe headache
- Excessive sleepiness
- Aversion to bright light
- Vomiting and/or fever
- Dizziness
- Double or blurred vision
- Weakness of any limbs
- Confusion or disorientation, unable to remember the recent past
- Apparent alteration in level of consciousness

Yours sincerely

Mrs Vanessa Payne  
Head Teacher
